**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S.

Patent No. 6,474,262 to Cecon.

Regarding Claim 1, Cecon teaches a litter box with a semi-permeable cover (#40) configured and sized to be removably fitted on four walls delimiting the container (#12) part; the semi-permeable cover made of a partitioning material that is tough and durable while offering permeable properties adequate for passing liquids but not necessarily solid waste or even the litter material in order to fully isolate a dog from the litter material; the semi-permeable cover has a solid frame (Fig. 4 #44a and 44b) within which the partitioning material is framed.

Regarding Claim 2, Cecon teaches the semi-permeable cover has a fastening means to fasten it to said container part (Fig. 5 #50).

Regarding Claim 3, Cecon teaches the fastening means is selected from the group of fastening clips (Fig. 5 #50).

Regarding Claims 4, 5, 6, Cecon teaches a handle (#22, 46a, 46b).

***Response to Arguments***

Applicant's arguments filed 11 October 2004 have been fully considered but they are not persuasive.

Cecon teaches that the litter box is designed for "small animals" and merely cites cats as one example of a small animal. Cecon does not exclude dogs from using the litter box. For example, it would be very easy for the Chihuahua breed of dog to utilize the litter box of Cecon.

Examiner disagrees with applicant's statement that dogs cannot be trained to enter the device of Cecon. It is old and notoriously well-known that dogs are receptive to training. Dogs have been notoriously trained to go through dog doors, into dog houses, and into pet carriers/crates (i.e. enclosed areas). U.S. Patent No. 4,667,622 to Breault is cited merely to illustrate that it is known in the art to train dogs to use closed cover litter boxes (Breault Col. 1 line 9-11). The following three U.S. Patents also illustrate that dogs can use the same style litter box that cats use even if the structure is an enclosed structure: U.S. Patent No. 5,471,950 (Col. 16 line 19-20); U.S. Patent No. 5,782,206 (Col. 3 line 22-24); and U.S. Patent No. 6,286,458 (Col. 3 line 36-40).

Therefore, the examiner maintains that Cecon teaches all of the claimed structural limitations and has the ability to function as a litter box for dogs.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: U.S. Patent No. 6,286,458; U.S. Patent No. 5,782,206; U.S. Patent No. 5,471,950; U.S. Patent No. 4,667,622.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
